Education

The University of Adelaide **Australia**
Bachelor of Mathematical and Computer Sciences, GPA: 6.5/7.0 *2022 Jan – 2024 Dec*
Majoring in Distributed Systems and Networking

Experience

Global Technology Integrator Ltd. **Hong Kong**
Network / System Engineer *2021 Aug – 2021 Nov*
- Spearheading the automation and parallelization of our tasks, including account migration and registry modification
- Helping resolve our staff shortage by reducing the manpower and time required for each task
- Taking the position as a mentor for new staff, helping them understand the technology that we're using

Projects

The Sound of Personality (link) **Australia**
JavaScript, Spotify API *2023 Mar – 2023 Mar*
- Figuring out and troubleshooting the Spotify API to estimate the user's MBTI type based on their music preferences
- Boosting team morale by encouraging everyone to ensure that we are all motivated to work on the project
- Demonstrating quick learning skills with my swift adoptation of the API despite it being my first time dealing with APIs

Negative Base Converter (link) **Australia**
HTML, CSS, JavaScript *2022 Nov – Present*
- Web app that converts numbers from any base to any other base, including negative bases
- Which have the unique property of being able to represent all positive and negative numbers without using a negative sign
- Researching an algorithm that can deal with the conversion properly when it comes to fractional numbers

Pokemon Battles **Australia**
C++, Make, LaTeX *2022 Sep – 2022 Oct*
- Text-based, turn-based, Pokemon battle game where the player battle against a computer-controlled opponent
- Leading the coding part of the project and helping my teammates learn the more difficult concepts in C++ and OOP
- Creating a positive work environment and building strong personal relationships with each other

allRGB **Hong Kong**
Python, Pillow *2021 Sep – 2021 Dec*
- Part of a bigger project started by "deidee", which has the objective to create images with one pixel for every RGB color
- My program takes any image and converts it into an allRGB image
- As this was my first programming project ever, my program used the brute-force solution, it was quite inefficient
- Now that I am familiar with algorithm design and data structures, I plan to rewrite the program

Community involvement

The Computer Science Club at The University of Adelaide **Australia**
Committee Member *2022 Dec – Present*
- Updating our website to provide up-to-date information regarding our events
- Collecting feedback from our members and using it to improve our events

Skills & Achievements

Languages

Proficient: C++ **Intermediate / Beginner**: Bash, C, CSS, HTML, JS, LaTeX, MATLAB, Python
Human: English (fluent), Cantonese (native), Mandarin (advanced), German (beginner)

Prizes

Subject prize: Information and Communication Technology 2021 *Achiever of the best results amongst peers*

Scholarships

University of Adelaide: 30% Global Citizens Scholarship *Best possible scholarship for international students*
