Learning to solve a Rubik's Cube at the age of 10, I discovered my passion for problem-solving. As I continued to pursue my interest in puzzles, I realized the similarities between puzzles and programming. Currently seeking opportunities to apply my skills in a professional setting, I am looking for a software engineering internship.

Highlights

Languages

Proficient: C++ **Intermediate / Beginner**: Bash, C, CSS, HTML, JS, LaTeX, MATLAB, Python

Human: English (fluent), Cantonese (native), Mandarin (advanced), German (beginner)

Prizes

Subject prize: Information and Communication Technology 2021 *Achiever of the best results amongst peers*

Scholarships

University of Adelaide: 30% Global Citizens Scholarship *Best possible scholarship for international students*

Education

The University of Adelaide **Australia**
Bachelor of Mathematical and Computer Sciences, GPA: 6.5/7.0 *2022 Jan – 2024 Dec*
Major: Distributed Systems and Networking

HKCCCU Logos Academy **Hong Kong**
Hong Kong Diploma of Secondary Education, Best 5: 22 *2010 Sep – 2021 Jul*
Electives: Information and Communication Technology, Physics, Biology

Experience

UNIHACK **Australia**
Organizer *2023 Apr – Present*
- Logistics and marketing
- Increasing UNIHACK's presence in South Australia

The University of Adelaide Computer Science Club **Australia**
Committee Member *2022 Dec – Present*
- Updating our website to provide up-to-date information regarding our events
- Collecting feedback from our members and using it to improve our events

Global Technology Integrator Ltd. **Hong Kong**
Network / System Engineer *2021 Aug – 2021 Nov*
- Spearheading the automation and parallelization of our tasks, including account migration and registry modification
- Helping resolve our staff shortage by reducing the manpower and time required for each task
- Taking the position as a mentor for new staff, helping them understand the technology that we're using

Projects

Binary Search on Color (link) **Australia**
HTML, CSS, JavaScript *2023 Mar – Present*
- Using the binary search algorithm to find the color that is closest to the user's desired color with accurate RGB values
- An attempt to combat indecisiveness when it comes to choosing colors

The Sound of Personality (link) **Australia**
JavaScript, Spotify API *2023 Mar – 2023 Mar*
- Figuring out and troubleshooting the Spotify API to estimate the user's MBTI type based on their music preferences
- Boosting team morale by encouraging everyone to ensure that we are all motivated to work on the project
- Demonstrating quick learning skills with my swift adoptation of the API despite it being my first time dealing with APIs

Negative Base Converter (link) **Australia**
HTML, CSS, JavaScript *2022 Nov – Present*
- Web app that converts numbers from any base to any other base, including negative bases
- Which have the unique property of being able to represent all positive and negative numbers without using a negative sign
- Researching an algorithm that can deal with the conversion properly when it comes to fractional numbers

Pokemon Battles **Australia**
C++, Make, LaTeX *2022 Sep – 2022 Oct*
- Text-based, turn-based, Pokemon battle game where the player battle against a computer-controlled opponent
- Leading the coding part of the project and helping my teammates learn the more difficult concepts in C++ and OOP
- Creating a positive work environment and building strong personal relationships with each other

MATLAB Minigames **Australia**
MATLAB *2022 April – 2022 May*
- Multiple minigames made in MATLAB with a command-line interface
- Including Blackjack, Minesweeper, and a coordinate-guessing game

allRGB **Hong Kong**
Python, Pillow *2021 Sep – 2021 Dec*
- Part of a bigger project started by "deidee", which has the objective to create images with one pixel for every RGB color
- My program takes any image and converts it into an allRGB image
- As this was my first programming project ever, my program used the brute-force solution, it was quite inefficient
- Now that I am familiar with algorithm design and data structures, I plan to rewrite the program

Competitions

International Collegiate Programming Contest – ANZAC Round 1 **Australia**
Participant *2023 Mar – 2023 Mar*
- Putting my programming skills to the test in a 5-hour competition
- Connecting with my peers from the Competitive Programming Club

IMC – Prosperity **Australia**
Participant *2023 Mar – 2023 Mar*
- Displaying problem-solving skills in the manual trading sections
- Developing an understanding of arbitrages and how they work

Optiver – Ready Trader Go **Australia**
Participant *2023 Mar – 2023 Mar*
- Developing an understanding of financial markets and trading
- My introduction to algorithmic trading

UNIHACK 2023 **Australia**
Participant *2023 Mar – 2023 Mar*
- Joining 5 fellow software engineering students to compete in our first ever hackathon
- Largest hackathon in Australia

DownUnderCTF 2023 **Australia**
Team Member *2022 Sep – 2022 Sep*
- Largest CTF competition in Australia
- Placed in the top 4% amongst international teams

UACTF **Australia**
Team Leader *2022 Jul – 2022 Aug*
- Leading a team of my friends to compete in our first ever CTF competition
- Placed in the top 8% amongst international teams

Volunteering

Ravi's Study Program **Australia**
Advanced Graduate *2022 Nov – 2023 Feb*
- Receiving mentorship from dozens of employees from FAANG, big tech, and trading companies
- Hosting semi-weekly mock interviews and providing feedback for each other
- Helping each other with our questions regarding algorithm design and data structures
- Curating a list of resources that we can use to prepare for interviews

The University of Adelaide **Australia**
Campus tour support *2022 Aug – 2022 Aug*
- Guiding prospective students and their parents around the campus

AdelaideB9 **Australia**
Team Member *2022 Sep – Present*
- Official member of the official univeristy team on CTFTime, participating in various CTF competitions
